

# FOR SALE

## 200P Sky Watcher Explorer Newtonian

I attach a few photos. The scope itself is fine. The tripod is fully functional, though you'll see from a couple of the photos it's a little corroded in places. As far as I can tell this is cosmetic. It needs a new wing fitting at the base of one of the legs.

I also have a selection of lenses and filters too.

I'm still a little vague about price. New they're around £680. Would £290 be okay?
